

Cambodia and Vietnam Spiritual Tour

with Jonette Crowley, November 2016

Channeled Answers, May 2016

Q. What is the significance of this triad? Why Cambodia (specifically Angkor Wat), Australia and Tibet? (MARK had channeled that Jonette must take groups to each of these 3 places over the next 3 years.)

There is a locus of worldwide change that will be focused on Asia. There is a global energetic instability there that will be addressed in these three visits. There is a realignment needed with modern high-energy to be inserted into the grid in Asia. Asia has much ancient high energy but some of that energy has been corrupted. The lay lines have been corrupted. An impulse of big-hearted, high-energy intensional work can do miracles in updating the grid in Asia and for the entire planet.

Q. What is the spiritual mission for this first tour to Cambodia and Vietnam?

Number one is the healing of recent wars, incredible trauma, and sexual abuse in the area. Until healing takes place it is hard for the spiritual energies to be realigned. The realignment will take place in and around the temples of Angkor Wat. The group will be guided to 3 particular places for specific meditations in the Temple City. There needs to be awareness of the continued rebirth of the Divine Feminine in these cultures.

Q. What else should we tune into while we are there?

It is important in this first journey that you attract some strong couples: male and female balanced.

Q. How was this Temple complex connected to the world grid?

Angkor Wat has always been an interstellar energetic receiving station. It was a place where stellar energies were transformed or stepped down so they could be transferred into the earth grid. The stepping down now needs to be stepped up.

Q. In regard to Angkor Wat, what is the connection to Mount Meru?

The intention of Angkor Wat is to be heaven on earth, Shambala, and so it mirrors the high energies of Mount Meru and any high mountain dedicated to the gods.

Q. Is Angkor Wat a star-gate connected to the ET's?

Angkor Wat has been an active star-gate connected to the ET's. There is less ET energy there now. Simply put, in the beginning, before these current temples were built, the area was a place of high ET energy. There has been corrupted or lower ET energy over the last many hundreds of years, that have kept the civilizations there oppressed. What your group can do with intention is to help establish a high enough energy frequency so that corrupted ET influence is replaced by the original, pristine influence of the original star-gate.

Q. What is the importance of the Divine Feminine at Angkor Wat?

The temples at Angkor were always dedicated to beauty, whether it was natural beauty, or the natural beauty of womanhood. The builders also knew the creative power of woman. They wanted to have the temple hold creative power. So it was not just a place of worship; it was a place for energetic renewal. The travelers who are drawn to this journey will be drawn to a higher level of energetic renewal and rebalancing. This must take place because of all the crises and humanitarian horrors that have happened in this area.

Q. How are the temples related to the stars in Draco in 10,500 BC?

There was a huge tectonic shift right before then. You will know more when you are there. The original temples were built after a catastrophic shift.

Q. What other mysteries should we know about?

Jonette has been on the search for the Grail, the golden cup. There will be stories of golden cups here that you will find. There may also be some relationship to the bird tribe people/gods that were found in ancient Crete.

Below the traumas that have happened in the area there is a very strong life force field. It is reminiscent of Lemuria.

Q. Is there something else we should know?

We invite the travelers to be keen observers, especially observers of your own thoughts and judgments. Although it's a tour and there will be a great deal of external stimulation, we invite the travelers to take time to journal and to notice the layers of distraction in your own mind.

Q. What is the calling to come to Cambodia that some people are experiencing?

In many ways it is a call for calmness, for the return of a Lemurian-like Utopia. So the call comes from the past, but it is directed toward humanity's future. It is important that Jonette and the group know that all of what will happen will be exceedingly impactful to planetary dynamics. She found that Israel was incredibly important. The overall significance of this trip will be five times that. It is very much a connection of heaven, and earth; earth and stars. It is a nexus point.
